Product View

Product Description

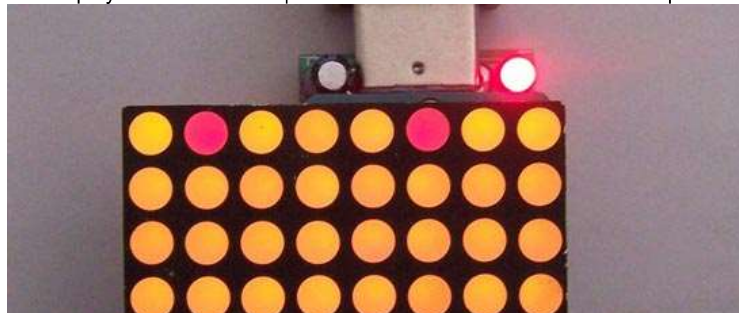

Applications:

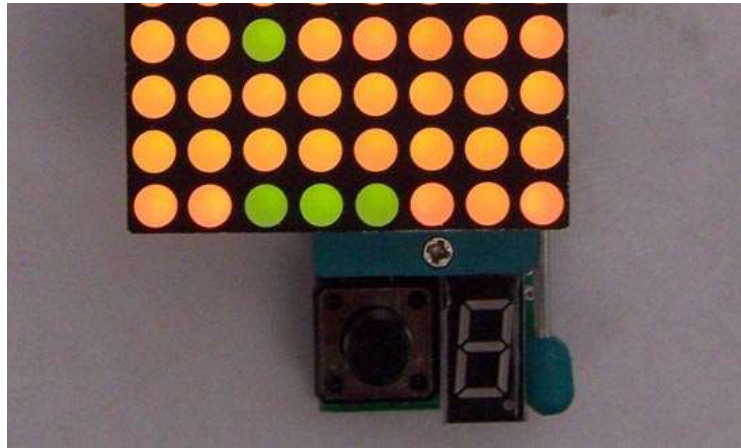

1. In the test range, can test DIP capsulation devices.
2. In the test range, can judge its type by testing the device logic function.
3. Can test the LED display device, including LED, digital tube, LED dot matrix modules.
4. Can test chip logic function, but don't test static current and working frequency, so this product only as a general electric appliance maintenance and electronic produce, is not suitable for use in scientific research. But it is enough to meet the needs of the most cases.

Features:

1. This tester can test 400 kinds of IC, and other LEDs, include:
 - A. 74LS, 74HC Serial 287 kinds;
 - B. CD4000 Serial 97 kinds;
 - C. others 18 kinds.
 Test range details pls contact us.
2. No need to input chip type, which can automatically recognize chips, test and then display the results.
3. Size: 60 mm×37 mm×15 mm, weight: 26 g (not include battery), super portable.
4. power by 1 piece battery (size AAA, all 1.0V-4.2V is suitable).
5. Test quickly, can complete test and show results about 1s.
6. If the chip is good, after 1s, LED will show chip type; If the chip is bad, LED will show "ERR"; If the chip is out of test range or place wrongly, it will show "ERR" or no result.

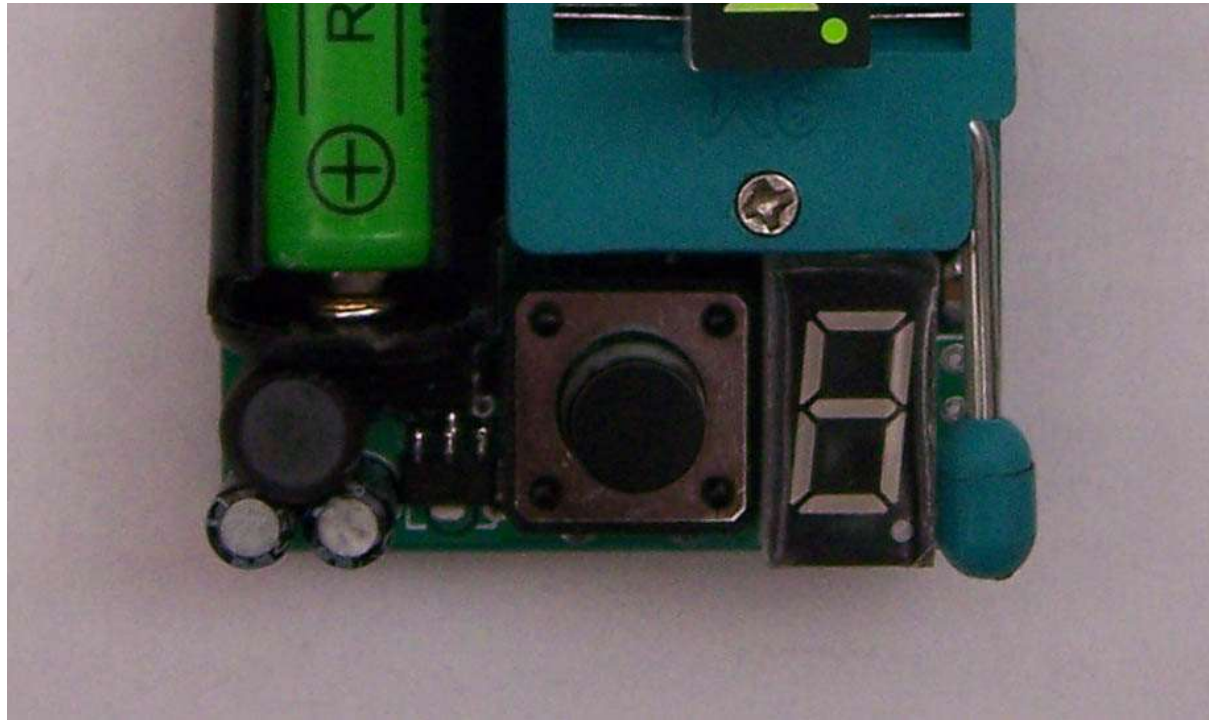

LED display device test example 1: LED dot matrix module with dead pixels

LED display device test example 2: Brightness comparison between green ultra-bright digital tube and high-brightness digital tube

LED display device test example 3: low-power LED light-emitting diodes of various colors

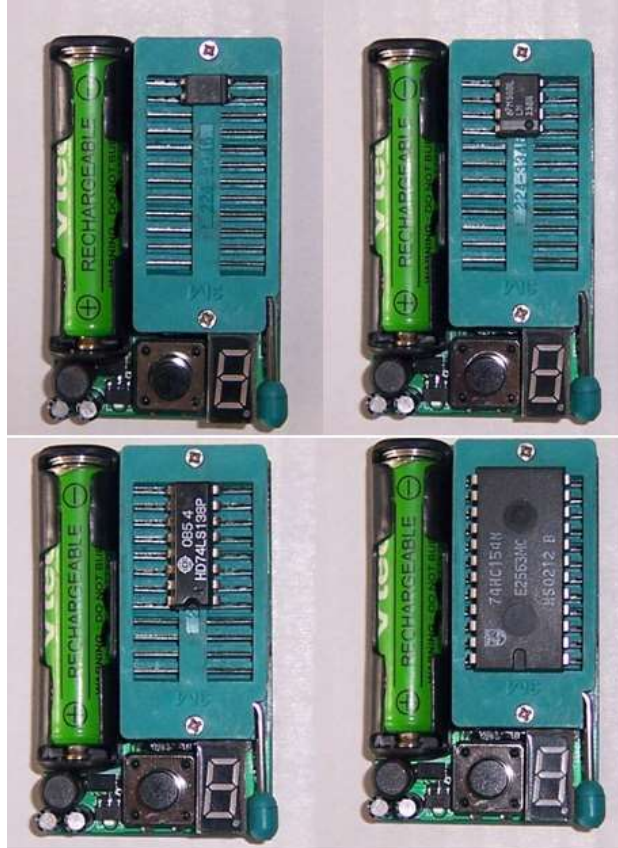

LED display device test example 4: LED light-emitting diodes of the same color to see if the color and brightness are uniform

Package include:

1 x Multi-Function IC LED Optocoupler LM399 DIP CHIP TESTER Model Number Detector

This is a powerful IC tester with a database of 74 series, 74LS series, 74HC series, 54 series, CD4000 series, HEF4000 series, CD4500 series, etc., in all over 1500 IC types.. The commonly seen ICs are included in its test range, such as below:
